

Sanitary Base Integrated Floor System

ECOsurfaces' Sanitary Base System creates an integrated floor system that supports sterile environments. By covering the joint at which two surfaces meet, moisture and germs are prevented from penetrating the area. The base is available in 7 colors. The system includes sanitary base, composition rubber underlayment, and Floor/Wall Contact Tape. Vertical seams must be cold welded (Bostik DUO-SIL is recommended).

Compatible Products

- Forest Rx
- Cosmos Rx
- Infinity Rx
